City Curriculum Days at More House

A More House curriculum is a curriculum without borders

Being in central London, More House is perfectly positioned to use all that the city has to offer as an extension of our school buildings. Our science labs are the London parks, the world-class museums are our exhibition halls and London's modes of public transport are our school corridors.

We make the best of all that London has to offer and we claim these special places as our own, providing as many opportunities as possible for our pupils to enjoy them, learn from them and think bigger than the four walls of their classrooms.

Over the past year, we have been building our City Curriculum Day (CCD) programme to ensure that our students get the most out of learning in and around London.

For the Autumn Term, we are pleased to include all year groups for our CCD programme for the first time.

On the next few pages, you can discover more about the experiences our students will enjoy in the Autumn Term. This includes the whole-year group CCDs as well as additional enrichment and revision activities for other year groups.

All planned CCDs for the Autumn Term will be recharged to your school account.

Payment details for additional enrichment activities will be communicated to you by the teacher in charge.

Year 7 Autumn City Curriculum Days

£39

Chocolate Museum and BBC Earth Experience

Thursday 19 October
ALL DAY

Transport

Zip cards please

Food

Picnic lunch in school

Return to school

15:00

What to pack

Small backpack with water and enclosed shoes

Teachers in charge: Ms Aldous and Mr Roberts

The aim of the day is for pupils to have an opportunity to think deeply about the connections between science, medicine, life and art. Pupils will also be able to consider the provocative and highly influential concept of psychoanalysis. This will provide fascinating and enriching insights to the girls' studies and critical thinking skills.
